

Bits & Bites Node.js

Harald Dam & Milco Numan

17 april 2018

Onderwerpen

- Wie ben ik?
- Wat is Node.js?
- Waarom Node.js?
- Node & NPM
- Node & Express
- Node & MongoDB
- Node – pros/cons
- JavaScript voorbeeld
- Workshop – inhoud
- Start your engines!

Wie ben ik?

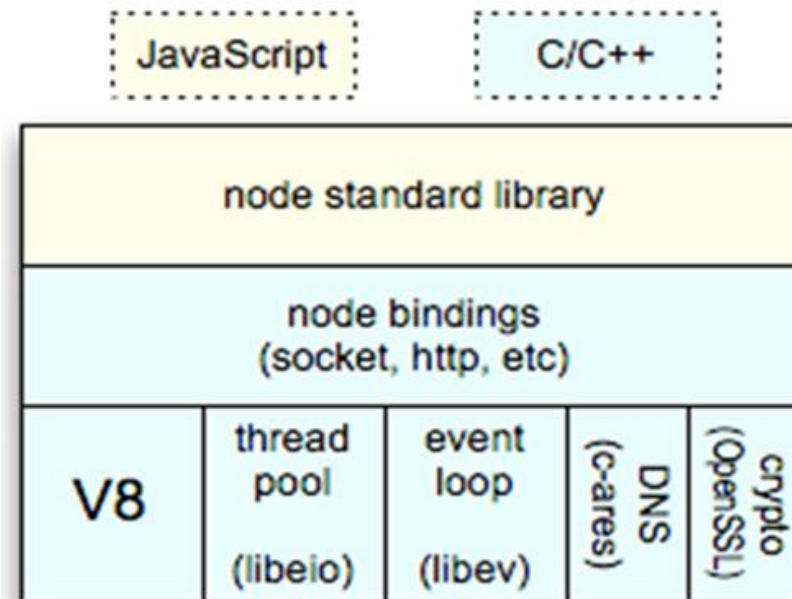

- Milco Numan, Hoofddorp
- Fysische Chemie (UvA, 1993)
- IT sinds 1996:
 - RijkscomputerCentrum (Borland Delphi 1.0)
 - Serac (BaaN)
 - Oracle, Ciber, Qualogy (Oracle Applications, DB 8i-11g & FMW 11g/12c)
 - SynTouch (2016) – Oracle Fusion Middleware
- Ervaring met Node.js:
 - PoC @ Rabobank, API Platform Cloud Service (2015/6)
 - AWS/Serverless (2017/2018)

Wat is Node.js?

- JavaScript (Netscape Navigator, 1995)
- ECMAScript (JavaScript, Jscript)
- JavaScript – scripting taal
- Chromium/Chrome: Google V8 Engine (2008)
- Node.js (2009) – server side JS runtime op V8

- DEMO:
 - Node REPL
 - Node/Chromium debug

Waarom Node.js?

Node.js® is a JavaScript runtime built on [Chrome's V8 JavaScript engine](#). Node.js uses an event-driven, non-blocking I/O model that makes it lightweight and efficient. Node.js' package ecosystem, [npm](#), is the largest ecosystem of open source libraries in the world.

Important March 2018 security upgrades now available

Download for Windows (x64)

8.11.1 LTS

Recommended For Most Users

9.11.1 Current

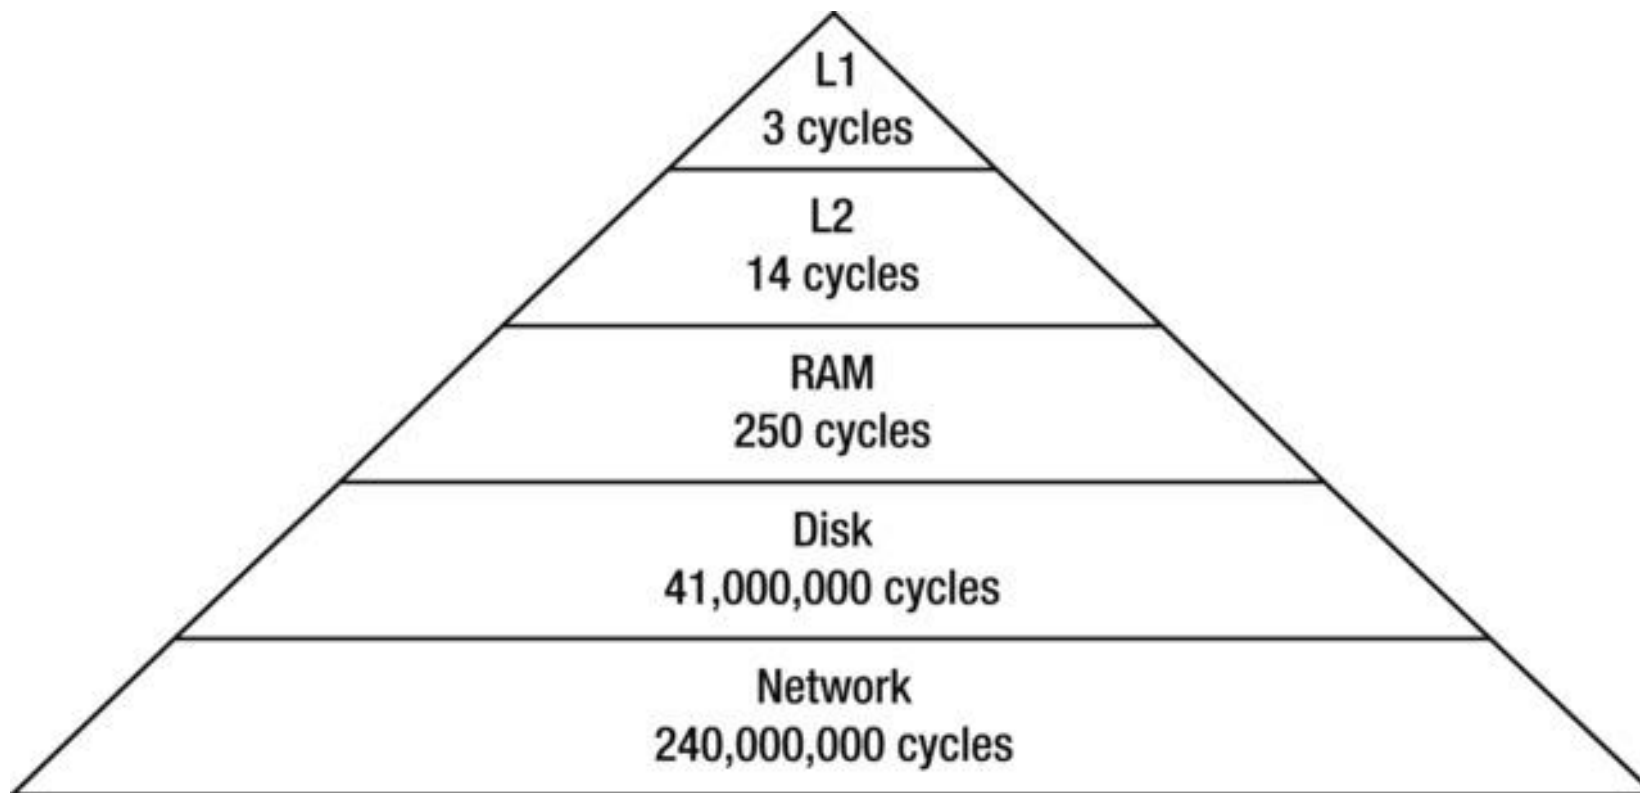

Latest Features

Relatieve I/O snelheden

Uit Ryan Dahl's originele Node presentatie (JSConf, 2009)

Blocking/non-blocking

- Demo: twee implementaties

```
JS syCustomer.js ●
1  var sync = require('./lib/doSyncStuff');
2
3  function p(data) {
4      console.log(JSON.stringify(data));
5  }
6
7  // retrieve two customers from DB and show
8  p(sync.doSyncStuff('Brouwerij Het Uiltje'));
9  p(sync.doSyncStuff('Raboboerenleenbank'));
10
11 console.log('Today is ' + new Date());
```

```
JS asCustomer.js ●
1  var async = require('./lib/doAsyncStuff');
2
3  function p(data) {
4      console.log(JSON.stringify(data));
5  }
6
7  // retrieve two customers from DB and show
8  async.doAsyncStuff('Janssen & Tilanus', p);
9  async.doAsyncStuff('Schmidt Zeevis', p);
10
11 console.log('Today is ' + new Date());
```

Node: asynchronous, non-blocking I/O

- Synchroon (sequentieel)

- Asynchroon (callbacks):

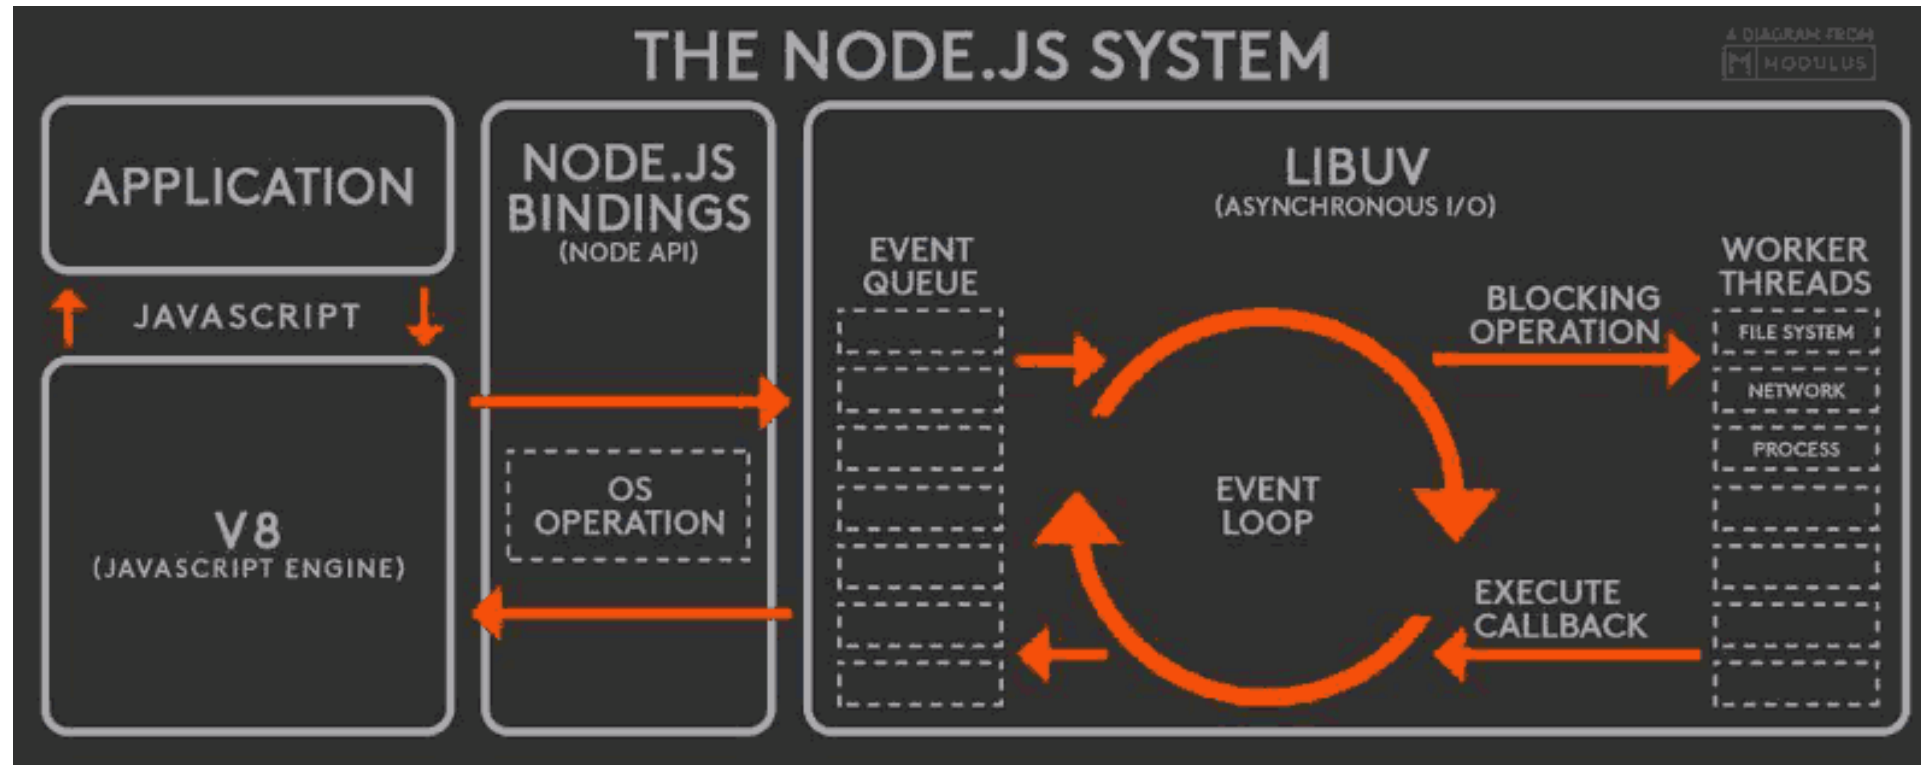

Wat is het effect?

Klassiek (Apache, multi-threading) of asynchroon, non-blocking I/O?
C10K challenge – 10.000 requests/s

Node & NPM

- Demo:
 - npm init
 - npm install
 - package.json

```
node@node-VirtualBox:~/hoppeta$ more package.json
{
  "name": "hoppeta",
  "version": "1.0.0",
  "description": "Demo npm",
  "main": "app.js",
  "scripts": {
    "test": "test-me-please"
  },
  "keywords": [
    "Hello",
    "World"
  ],
  "author": "Milco Numan",
  "license": "ISC",
  "dependencies": {
    "express": "^4.16.3"
  },
  "devDependencies": {
    "chai": "^4.1.2",
    "mocha": "^5.1.0"
  }
}
node@node-VirtualBox:~/hoppeta$ █
```

MEAN

- MEAN – fullstack JS development

MongoDB is the leading NoSQL database, empowering businesses to be more agile and scalable.

Express is a minimal and flexible node.js web application framework, providing a robust set of features for building single and multi-page, and hybrid web applications.

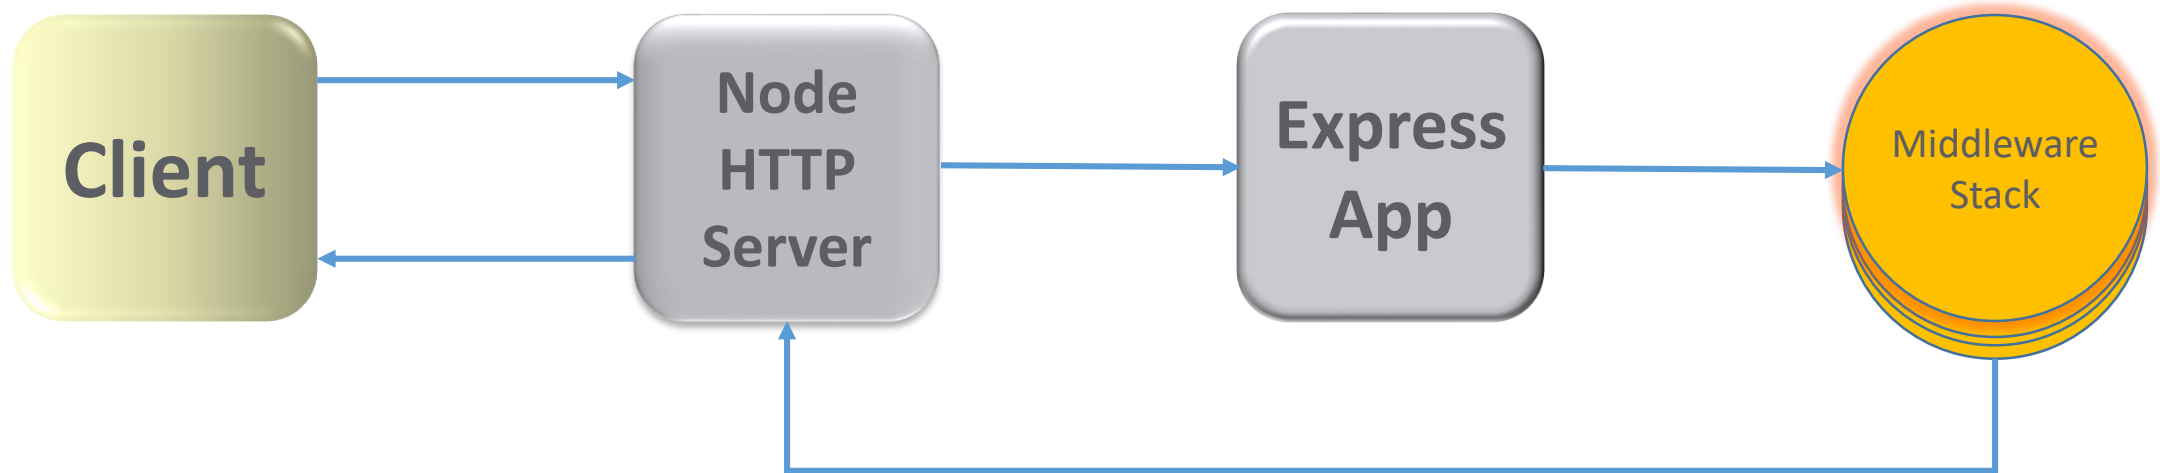

AngularJS lets you extend HTML vocabulary for your application. The resulting environment is extraordinarily expressive, readable, and quick to develop.

Node.js is a platform built on Chrome's JavaScript runtime for easily building fast, scalable network applications.

Node & Express

- “Express is an unopinionated, minimalistic framework on top of Node’s web server functionality, simplifying its API and adding new features”

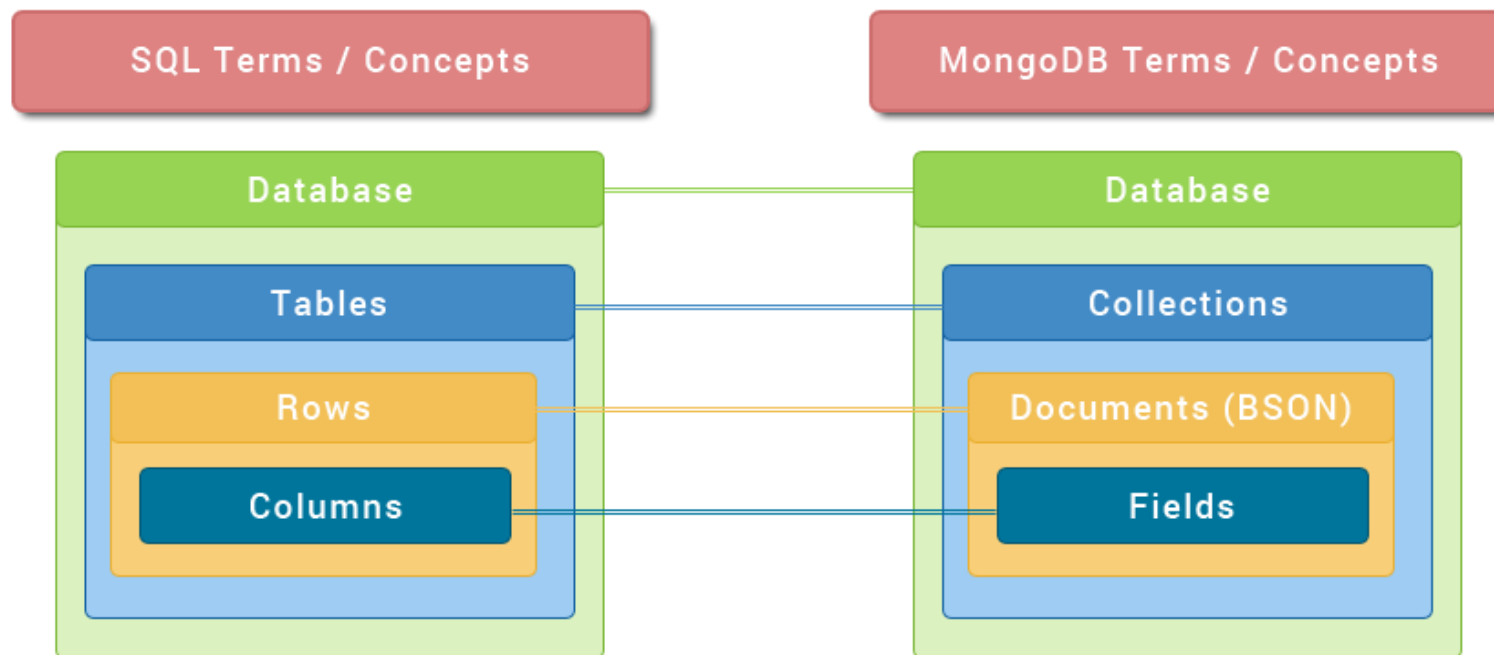

Express Demo

```
JS app.js x
1  const express = require("express");
2  const logger = require("morgan");
3  const app = express();
4  const MORGAN_FORMAT = "dev";
5  const LISTEN_PORT = 3000 || process.env.PORT;
6  function reneFrogger(req,res){
7    res.status(200).send(`Just say: hello ${req.params.name} ? req.params.name : 'world'!`);
8  }
9  // add logging middleware
10 app.use(logger(MORGAN_FORMAT));
11 app.get("/hello", reneFrogger);
12 app.get("/hello/:name", reneFrogger);
13 app.listen(LISTEN_PORT);
```

Node & MongoDB

- MongoDB is dé document-oriented NoSQL database
- JavaScript engine is inmiddels vervangen (vroeger V8!)
- MongoDB worden JSON documenten opgeslagen

Node – pros

- Asynchrone, non-blocking I/O – goede schaalbaarheid
- UNIX filosofie – do one thing well, extend where needed
- Groot ecosysteem aan uitbreidingen (npm)
- Gebaseerd op JavaScript (eenvoudig te leren)
- Fullstack JavaScript
- Gemakkelijk om mee te prototype
- Breed leveranciersondersteuning in de Cloud (geen C#)
- Verschillende soorten toepassingen:
 - web app
 - API
 - Command line tools
 - Desktop applications (Electron: Visual Studio Code, Atom editor)

Node – cons

- Niet voor rekenintensieve toepassingen
- Gebaseerd op JavaScript:
 - Transpiler (source-to-source): Babel, TypeScript, CoffeeScript)
- Callback hell
- Te weinig dwingend (structuur/richtlijnen)

JavaScript 101

```
const s = "String value";
const n = 3.1415926;
const b = true;
const a = [1,1,2,3,5,8,13,21,34,55];

const fun = function(){
  for (let arg in arguments){
    console.log(arguments[arg]);
  }
};

const o = { what: "I am an object", why: "Because I can",
  functie: fun};

fun(s,n,b,o,a);
```

Workshop - Inhoud

- “*Hergebruik is puik*” / “*Reuse is reuze*”
 - Materiaal is deels hergebruikt uit een andere Workshop
- Twee tracks:
 - Explorer – ontdekkingsstocht langs Node, Express & MongoDB
 - Adventurer – avontuurlijke ontwikkeltocht met dezelfde ingrediënten
- VirtualBox:
 - Ubuntu 17.10 (git, curl)
 - node, npm (globaal: nodemon + JSHint)
 - IDE: Micro\$oft Visual Studio Code
 - Editors: vi(m), nano, gedit
 - Postman, Chromium, MongoDB

Syntax Highlighting VSCode (zie Errata in VirtualBox document)

Workshop - Explorer

- 1 – HelloWorld: introductie JavaScript/Node/NPM
- 2 – HTTP: afhandeling HTTP met core Node
- 3 – Express: HTTP APIs, nu met Express
- 4 – Build your own Spotify API with Express
- 5 – MongoDB & Node
- 6 – Bakje over:
 - Email versturen
 - Generators
 - Promises

Workshop - Adventurer

- Twee ‘uitdagingen’ (zelf bouwen):
 - BeerAPI – bouw je eigen MEN API op MongoDB met Node/Express
 - CLI – bouw een utility in Node à la UNIX “word count”
